DETAILED ACTION

Election/Restrictions

1. Claim 21 is generic to a plurality of disclosed patentably distinct species comprising 1) hafnium oxide, 2) lanthanum oxide, 3) zirconium oxide, 4) zirconium silicon oxide, 5) titanium oxide, 6) tantalum oxide, 7) barium strontium titanium oxide, 8) barium titanium oxide, 9) strontium titanium oxide, 10) yttrium oxide, 11) aluminum oxide, 12) lead scandium tantalum oxide, and 13) lead zinc niobate. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. One of the above species must be elected. Applicant is referred to MPEP 806.04 (c) and 806.04 (d) for the definition of a generic claim, also see MPEP 808.01 (a) for more details.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
